2.0 Diesel Auto (A8) 150PS	370	114	5.3	3.9	4.4	207	9.3

From 1 September 2017, certain new vehicles will be type-approved using the Worldwide Harmonised Light Vehicle Test Procedure (WLTP), according to (EU) 2017/1151, as last amended, which is a new, more realistic test procedure for measuring fuel consumption and CO2 emissions. From 1 September 2018 the WLTP will fully replace the New European Drive Cycle (NEDC), which is the current test procedure. During NEDC Phase-out, WLTP fuel consumption and CO2 emissions are being correlated back to NEDC and will be shown as CO2mpas figures. There will be some variance to the previous fuel economy and emissions as some elements of the tests have altered i.e., same car might have different reported fuel consumption and CO2 emissions. To learn more about the new testing procedures, please visit <http://wltpfacts.eu/>. The figures in the table above are CO2mpas figures.
